#### *Point-of-Care software applications for education and practice*

**Joshua Steinberg MD, Family Medicine, Clinical Campus**, collaborating with HeeRak Kang MSIV, produces free iPhone software applications on medical topics written specifically for students, residents, and clinicians in order to both educate and elevate clinical practice. We have surpassed 300,000 downloads worldwide, and wish to announce our latest offering.

Step-by-Step: The app presents the Step-by-Step algorithm for use at the point-of-care when febrile infants  $\leq 90$  days old in the Peds ED environment. The app was developed in collaboration with the Spanish physician study author, Borja Gomez, and offers the evidence-based algorithm and supporting educational material. The app is free for iOS (iPhone) devices, available here:

## Notes & Corrections:

Please Note:

1. In an effort to keep the Faculty Commons manageable, we will be concentrating on external presentations and service.
2. Please remember – we do not include any publications, books, book chapters, etc. that are currently “**in press**”. Please wait until you have publication information before you include these submissions
