Medtronic Shiley Tracheostomy Tube Recall/Backorder

Medtronic has issued a recall on some skus of Shiley tracheostomy tubes which has resulted in backorders. We are currently experiencing shortages of the following:

- Shiley 6.5 Cuffed (4CN65H/Lawson # 54648)
- Shiley 7.5 Uncuffed (6UN75H/Lawson # 54625)
- Upstate usually stocks these Shiley tracheostomy tubes packaged with disposable inner cannulas. We will need use Shiley tracheostomy tubes that are packaged with two REUSABLE inner cannulas during the backorder period.
- The reusable inner cannula can be cleaned per policy CM T-05 or discarded/set aside for home use and replaced with disposable inner cannulas during the inpatient stay.

We will continue to source our usual product as it becomes available.

Thank you for your patience and understanding.
