

make sick people well, but it can also make well people sick. Many medicines can display to be stored up high (out of reach of children) and in locked cabinets whenever possible. 2) Medicines can make sick people well, but it can also make well people sick. Many medicines look and sometimes taste like candy - even though they're not. 3) Vitamins often contain Iron, and iron is the leading cause of death in children from poisoning. 4) Alcohol is a poison, in addition to alcoholic beverages many mouthwashes, colognes, aftershaves, perfumes contain large amounts of alcohol. 5) Cigarettes and cigarette butts are poisonous if eaten (they're not healthy to smoke either!) 6) Pesticides (including bug sprays, bug "traps", and moth balls) are often highly poisonous. 7) Many purses, bags, backpacks and briefcases contain items that are poisonous to people and animals. Now, can you look for the poisoning hazards in your own home?
