

Information for You from Your Health Care Team

ALBUTEROL

(al-BYOO-ter-all)

Brand Names: VENTOLIN, PROVENTIL

- My doctor also calls Albuterol a bronchodilator
- Albuterol is a **Rescue-Relief Medicine**

What does Albuterol do?

- Makes me breath easier
- Relaxes and opens the airways in the lungs
- Works for 2 to 4 hours
- Treats wheezing with asthma

When do I use Albuterol?

- During an asthma flare-up
- When I am coughing, wheezing, short of breath, or sick with an illness
- Sometimes before exercise and sports

How do I use Albuterol?

- With a metered dose inhaler (puffer) and holding chamber (spacer)
- OR with a nebulizer
- Your health care provider will tell you how to use Albuterol
- **Parents:** Check the dose of Albuterol on your child's Asthma Action Plan

How should Albuterol be stored?

- In a cool, dry place away from sunlight
- Do not freeze
- Keep out of reach from children

What if I miss a dose of Albuterol?

- Do not use extra medicine to make up for a missed dose
- Call your doctor's office for advice

What are some of the side effects of Albuterol?

- Shaking or jitters
- Fast heartbeat
- Nervousness
- Trouble sleeping
- Cough or dry mouth
- Upset stomach
- Vomiting

CALL DOCTOR NOW!
