COLLEGE OF MEDICINE

EXCEPTIONAL MOMENTS

IN TEACHING

Aaron Glass, PhD, MB (ASCP), Assistant Professor of CHP-Clinical Laboratory Science and Assistant Professor of Microbiology and Immunology, is the **June 2020** Recipient of the **Exceptional Moments in Teaching** recognition.

COMMENTS FROM DR. GLASS'S STUDENTS:

“Dr. Glass is incredibly effective at teaching and his use of pop references and mnemonics are incredible and really help facilitate learning. He was exceptionally great at distilling information and teaching us. Really, he’s just an amazing educator.”

“Every lecture that this professor has given us has been very clear, concise, straightforward and enjoyable. I think he very clearly cares about how well we learn the information and it seems as though he goes to great lengths to communicate it in a way that is easiest to understand. I always have a clear sense of what he was trying to teach and what he would like us to take away from the lectures.”

“Dr. Glass is an amazing professor. He has mastered the skill of presenting information to us in such a straightforward and fun way. He is also approachable and would explain a particular concept multiple times if he had to.”

“Dr. Glass puts a ton of time and attention into his PowerPoint presentations. The visuals make it so easy to memorize and thoroughly understand the topic being presented. It has been an honor to be one of his students.”

The College of Medicine recognizes exceptional teachers with the monthly “Exceptional Moments in Teaching” program. Honorees are selected via student assessments from courses and clerkships.

Recognized teachers — including medical faculty, residents, nurses and other educators — are those who challenge students and provide an exceptional learning experience.
